

Assignment 1

학번 : 2014310198

이름 : 남재윤

Development environment

OS version

: ubuntu 14.04 LTS (64bit)

gcc version

: 4.8.2

cat /proc/version 실행결과

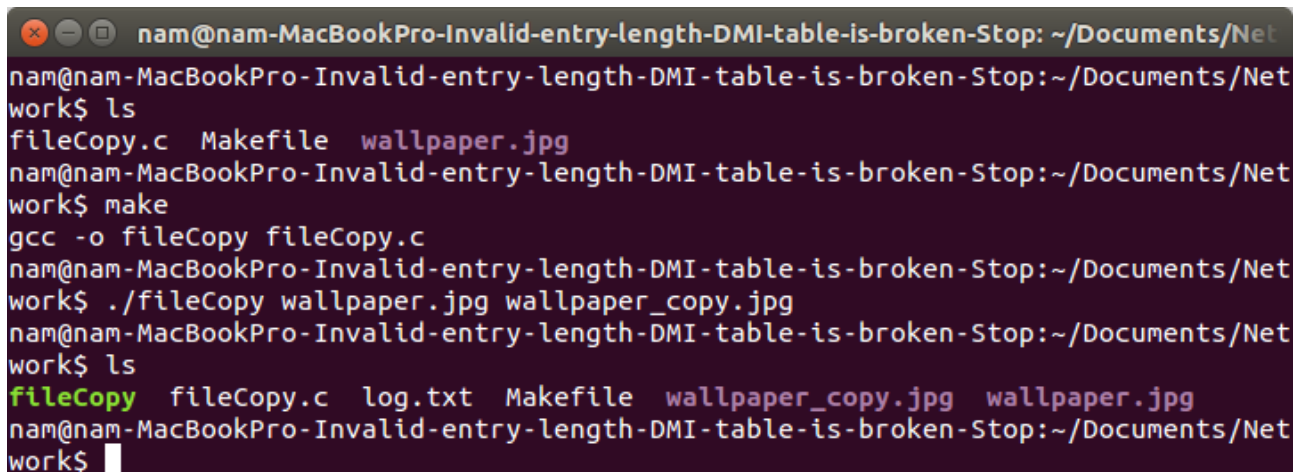

: Linux version 4.2.0-27-generic (bulld@lcy01-23) (gcc version 4.8.2 (Ubuntu 4.8.2-19ubuntu1))

programming language

: C

How to test program

1. Put fileCopy.c , Makefile, a file to copy into same directory.
2. 'make' command would make a runnable file named fileCopy.
3. Enter './fileCopy <file name>'
4. Get result.

```
nam@nam-MacBookPro-Invalid-entry-length-DMI-table-is-broken-Stop: ~/Documents/Net
work$ ls
fileCopy.c  Makefile  wallpaper.jpg
nam@nam-MacBookPro-Invalid-entry-length-DMI-table-is-broken-Stop:~/Documents/Net
work$ make
gcc -o fileCopy fileCopy.c
nam@nam-MacBookPro-Invalid-entry-length-DMI-table-is-broken-Stop:~/Documents/Net
work$ ./fileCopy wallpaper.jpg wallpaper_copy.jpg
nam@nam-MacBookPro-Invalid-entry-length-DMI-table-is-broken-Stop:~/Documents/Net
work$ ls
fileCopy  fileCopy.c  log.txt  Makefile  wallpaper_copy.jpg  wallpaper.jpg
nam@nam-MacBookPro-Invalid-entry-length-DMI-table-is-broken-Stop:~/Documents/Net
work$
```
